Sharon is the Director of Operations for Medical Practice Management, LLC and has filled various management roles in the healthcare industry since 1980. She is responsible for managing the day-to-day functions of the billing office and reviewing monthly accounts receivables to assure the optimal financial performance for our clients. Sharon also serves as MPM's client liaison, works on various special projects and performs other office management administrative duties as needed.

Her vast amount of multi-specialty knowledge in healthcare management, sales, customer service, revenue cycles and IT solutions correlates perfectly with MPM's diverse physician client base. Sharon has held management roles for many large specialty practices throughout her career including urology/oncology, cardiology, surgery and allergy/asthma.

Sharon also spent 6 years working for a medical software company. During that time she developed an in depth and comprehensive understanding of electronic medical record ("EMR") and practice management ("PM") systems. As a result of her IT solutions expertise, Sharon directs the "Meaningful Use" committee for MPM, and serves as a client resource for questions related to the 2009 Stimulus Package incentive funds.

Sharon has been elected as Past President and active board member for both Alabama MGMA and Mobile MGMA for more than 13 years. While holding leadership roles at these organizations, her responsibilities have included the coordination of activities, preparation of agenda, direction of meetings, distribution of information, delegation of responsibilities, organization of committees and maintenance of contacts with committee chairs.
